1. The following is an examiner's statement of reasons for allowance: the closest art Miyatake (USPN 6,773,121) teaches an antireflection film for use in producing display screens such as for liquid crystal displays, wherein the film comprises a hard coat layer formed on a transparent substrate having a 90 or more percent light transmission, such as triacetyl cellulose; wherein the hard coat layer is formed by radiation curing a UV curable resin coating comprising acrylic monomers and/or oligomers with preferably 3 to 6 functional groups, smectite particles having a particle size of 0.1 micron or less as thixotropy agents for the UV curable resin, a UV polymerization initiator, and fine transparent particles having a mean particle diameter of 1 to 10 microns in an amount of 1 to 20 parts by weight to resin 100 parts by weight. However, Applicant's arguments and declaration filed 6/8/06 overcome the reference. Hence, the prior art does not teach or render obvious the instantly claimed optical film recited in Claim 1 or the instantly claimed methods recited in Claims 34, 39 and 40.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Monique R. Jackson whose telephone number is 571-272-1508. The examiner can normally be reached on Mondays-Thursdays, 8:00AM-4:30PM.
